

Standards & Marks

# 

Model Number:	EUCO-600200G
Unit Weight:	~2.2kg
Dimensions (L × W × H):	285x100x49 mm

# **EUCO ARENA SPORT**

## **Highlights & Features**

- Output power: max 600W
- Wide input voltage: 198-440VAC
- Ultra high Efficiency 97.5%
- Control method: DALI-2 & D4i and RDM/DMX
- Programmable output current range 700-2000 mA
- Constant Lumen Output (CLO)
- Smart Timer Dimming (STD)
- Wide dimming range 0.1-100%
- High-accuracy integrated power metering
- Input surge protection: DM 6kV; CM 10kV
- Max remote distance 300 meters
- Reliable IP66 input/output connectors
- Low current ripple (typ.1%) for HDTV broadcasting
- Afterglow effect free

## **General Description**

Delta EUCO ARENA SPORT 600W series with DALI-2 & D4i or RDM/DMX control functions are constant current non-isolated LED drivers. It makes an ideal solution for Stadium Lighting due to its low ripple current level and flicker free, which is indispensable for Live TV broadcasting conditions. Also due to its robust design, the EUCO-600W is well-suited for industrial lighting, high mast lighting, and horticulture applications. This driver was specifically conceived and intended to offer remarkably high efficiency to achieve substantial energy savings. Additionally, a wide dimming range, advanced control, and autonomous dimming (Midnight Centric Timer) ensure adaptability for dynamic atmospheres and seamless event adjustments. The EUCO-600W driver offers a remote-control function, allowing the driver to be installed up to 300 meters from the luminaire, which provides greater flexibility in installation, operation, and easy maintenance for indoor and outdoor applications.

## **Model Information**

Model Number	Input Voltage Range	Rated Output Power	Output Channel	Control Interface
EUCO-600200GI	220/400Vac(typical) 198~440Vac(range)	600W	1	DALI-2 & D4i
EUCO-600200GD		600W	1	RDM / DMX

## **Model Numbering**

EU	С	Ο	600		G			
Market Code	Constant Current	Outdoor	Output power 600:600W	Output Current 200:2000mA (Max.)	i-Programming	Function I: DALI-2 & D4i D: RDM / DMX	Variable A – connector (with NTC) C – connector (with PE) D – cable (with PE)	Mode series, can be 0~9, A~Z or blank.

## **Specifications**

### Input Ratings / Characteristics

Specification	Min.	Тур.	Max.	Conditions
Nominal Input Voltage	220Vac	-	400Vac	
Input Voltage Range	198Vac	-	440Vac	
Nominal Input Frequency	-	50/60Hz	-	
Input Frequency Range	47Hz	-	63Hz	
Nominal Input Current	-	2.85A	3.1A	At 220Vac, 25°C, 600W output
Nominal Input Current	-	1.54A	1.82A	At 400Vac, 25°C, 600W output
	-	96.2%	-	At 220Vac, 25°C, 300V/2A
	-	96.6%	-	At 220Vac, 25°C, 550V/1.1A
Efficiency <sup>1</sup>	-	96.8%	-	At 400Vac, 25°C, 300V/2A output
	-	97.5%	-	At 400Vac, 25°C, 550V/1.1A output
Standby Dower Concumption	-	0.40W	-	At 230Vac/50Hz, Dim OFF, in compliance with Erp (EU) 2019/2020
Standby Power Consumption	-	0.89W	-	At 400Vac, Dim OFF
Power Factor	-	0.99	-	At 220Vac, 25°C, 600W output
Power Factor		0.98	-	At 400Vac, 25°C, 600W output
Total Harmonic Distortion	-	8%	-	At 220Vac, 25°C, 300V/2A output
Total Harmonic Distortion	-	13%	-	At 400Vac, 25°C, 300V/2A output
Inrush Current (Apk / 50%-us)	-	8A	-	At 220Vac,50%Apk to 50%Apk time: 2ms
	-	15A	-	At 400Vac,50%Apk to 50%Apk time: 2ms
Power metering accuracy	-	±1%	±2%	At 220Vac~400Vac,100% load

1. 100% Load and tested after 30 minutes warming up.

### **Output Ratings / Characteristics**

Speci	fication	Min.	Тур.	Max.	Conditions
Output Channel	S	-	1	-	
Default Output (	Current	-	1200mA	-	
Programmable Range	Output Current	700mA	-	2000mA	Operation range refer to Appendix 1
Output Voltage	Range	200V	-	550V	
Max. No Load C	Output Voltage	-	-	600Vrms	
Total Output Power		-	-	600W	
Output Power Range		-	-	600W	
Output Current Tolerance		-	-	±3%	700~2000mA
	Dinala	-	1%	2%	(ripple = (pk-pk)/avg), at low frequency(<8kHz)
Output Current	Кірріе	-	10%	18%	(ripple = (pk-pk)/avg), at high frequency(>15kHz)
Output Remote	Distance	-	-	300m	The total voltage drop on the cable should be within 5V
	DALI version	-	0.7s	1s	Compliant with clause 9.13 of IEC 62386-102:2014
Turn on Delay	RDM/DMX	-	0.7s	1s	Connecting to the controller correctly.
Time	version	1.25s	-	-	No controller or incorrect connection to the controller, compliant with clause 3.5 of ANSI E1.37-1:2012.

### Auxiliary Power Supply Ratings / Characteristics <sup>2</sup>

Specification	Min.	Тур.	Max.	Conditions
Integrated 24V Auxiliary Power	Supply			
Operating Voltage	21.6V	24.0V	26.4V	0.1W~6.0W, reference to "DA-".
High frequency ripple of operating voltage	-	-	$1.0 V_{pp}$	21.6V~26.4V, f <sub>ripple</sub> > 10kHz
Voltage in no-load condition	-	-	30.0V	Output power < 0.1W
Average output power capability	-	3.0W	-	CC mode load: 4.0mA~125mA (0.1W~3W).
Pulsed output power capability	-	6.0W	-	Dynamic CC mode load: peak load = 250mA/2.2ms and avg load = 4.0mA~125mA/3.8ms.
Start-up time	-	-	0.6s	From AC power on to Vaux increases and reaches 21.6 V, Mains is applied at any phase angle.
Integrated DALI-2 Bus Power Su	ipply			
DALI-2 Bus voltage	12V	-	22.5V	CC load: 0~50mA, integrated bus power supply is pre-configured to a disabled state, and it can be activated via GUI or DALI controller.
Over Current Protection	50mA	-	62.5mA	Auto recovery and no component damaged. Limits output current to 50~62.5mA when output is short-circuited.

2. This part applies to DALI version only.

### **Dimming Control**

Specification		EUCO-600200GI	EUCO-600200GD
Control interface		DALI-2	RDM/DMX
Logarithmic		0.1%-100% Minimum output current is limited to 2mA.	N/A
Dimining range	Linear	0.4%-100% Minimum output current is limited to 2mA	

#### **Control Interface Standards**

Specification	EUCO-600200GI	EUCO-600200GD
Control interface standards	DALI-2 & D4i IEC 62386-101 Ed 2.0 IEC 62386-102 Ed 2.0 IEC 62386-207 Ed 2.0 IEC 62386 part 150: Integrated 24Vdc auxiliary power supply IEC 62386 part 250: Integrated bus power supply <sup>3</sup> IEC 62386 part 251: Memory bank 1 extension (luminaire data) IEC 62386 part 252: Energy report IEC 62386 part 253: Diagnostics and maintenance	RDM/DMX ANSI E1.11 DMX512A ANSI E1.20 RDM – Remote Device Management ANSI E1.37-1 Additional message sets for dimmer

### Additional Dimming Features:

Specification	EUCO-600200G
Smart Timer Dimming (STD)	CLO is a function to make the brightness consistent by compensating the ageing of the light source over the lifetime. It's available in GUI to set starting dimming level (for example 90%) and end of life of the product (for example 50khrs), so that the driver by counting its functioning hours can do a linear interpolation in between starting dimming level at t=0hrs, and go to 100% at t=end of life. This function is not activated by default. For more details, please refer to "LNA/EUCO Series Programming Tool User Manual".
Constant Lumen Output (CLO)	CLO is a function to make the brightness consistent by compensating the ageing of the light source over the lifetime. It's available in GUI to set starting dimming level (for example 90%) and end of life of the product (for example 50khrs), so that the driver by counting its functioning hours can do a linear interpolation in between starting dimming level at t=0hrs, and go to 100% at t=end of life. This function is not activated by default. For more details, please refer to "LNA/EUCO Series Programming Tool User Manual".

### Environment & Package

	Specification		EUCO-600200GI	EUCO-600200GD			
	Ambient Temperature	Operating					
	Ambient Temperature	Storage	-40°C to +85°C				
2	All parameters are specified at 25°C ambient for all products unless otherwise indicated.						

www.DeltaPSU.com (May. 2025, Rev. 03)

Maximum Case Temperature		+85°C
Lifetime Case Temperature		+70°C
Deletive Humidity	Operating	10% to 95% RH (Non-Condensing)
Relative Humidity	Storage	5% to 95% RH (Non-Condensing)
Audible Noise (30cm	distance)	Sound Pressure Level (SPL) < 24dBA
Ingress Protection cla	ssification	IP66
Drop Test (Non-Operating)		According to ASTM D-775, 40cm height drop to concrete floor as below drawing, total 10 times.
Vibration		IEC 60068-2-6, Random: 5 Hz to 10 Hz (1G);
(Non-Operating) Packing		30 min per axis for all X, Y, Z direction   4pcs per carton

#### Protections

Specificati	on	Min.	Тур.	Max.	Notes
Input Under Voltage	nput Under Voltage Protection 160Vac - 180Vac				
Protection(IUVP)	Recovery	170Vac	-	190Vac	The driver shuts down and then restarts to normal status when
Input Over Voltage	Protection	460Vac	-	480Vac	the fault condition is cleared.
Protection(IOVP)	Recovery	440Vac	-	460Vac	
Open Load & Output Over Voltage Protection	Protection	-	-	600Vrms	Hiccup mode. The output voltage shall not exceed 600Vrms under no load, open load or other over voltage conditions.
Constant Output Powe	er Protection	-	610W	-	Output power limited. The driver shall come back to its original programmed current after the fault condition is cleared.
Output Short Circuit	Protection	-	-	-	Hiccup mode
Internal Over Temperature Protection		<b>85</b> ℃	-	<b>95</b> ℃	Output power derating. Refer to <u>Appendix 6 "Internal Over</u> <u>Temperature Protection"</u> for more details.
Programmable Exte Temperature Pro		<b>80</b> ℃	-	<b>110℃</b>	Output power derating. Refer to <u>Appendix 7 "Programmable</u> <u>External Over Temperature Protection"</u> for more details.

### Electro-Magnetic Compatibility (EMC)

Specification	Standards
EMC-Emission Characteristics	
Radiated Emission	EN55015, GB/T17743
Conducted Emission	EN55015, GB/T17743
Harmonic Current Emission	EN61000-3-2, GB 17625.1
Voltage Fluctuation & Flicker	EN61000-3-3

EMC-Immunity Characteristics	EMC-Immunity Characteristics				
Electrostatic Discharge(ESD)	EN 61000-4-2				
Radio Frequency Electro -magnetic Fields	EN 61000-4-3				
Electrical Fast Transient (EFT)	EN 61000-4-4				
Surge(AC Mains)	EN 61000-4-5 - Common Mode: 10kV <sup>3</sup> (Line to Earth, Neutral to Earth) - Differential Mode: 6kV (Line to Neutral)				
Conducted Disturbance	EN61000-4-6				
Voltage Dip & Interruptions	EN 61000-4-11				

3. Level B, the peak of residual common mode voltage pulse from output +/- to Earth is typically around 2.5kV.

#### **Reliability Data**

Specification	Test Conditions / Notes
Lifetime 50,000 hours applicable for 220Vac to 400Vac(50/60Hz) @100% of load, @ Ta 45°C Refer to "Lifetime versus Case Temperature Curve"	
MTBF	475khrs at Ta=+45°C Telcordia SR-332

## **Miniature Circuit Breaker Configuration**

The maximum number of LED drivers connectable to a single MCB is recommended in the following table for maximum 600W and each nominal input voltage. Due to the differences in application conditions and different kinds of miniature circuit breakers available on the market, this table is just for reference.

Input Voltage	МСВ Туре	10A	16A	20A	25A	32A	40A	63A
220Vac	B/C/D	3	5	6	8	10	13	20
400Vac	В	2	3	4	5	7	8	13
	С	4	6	7	9	11	14	22
	D	6	9	11	14	18	23	35

## **Electrical Connection**

1. A version (Output with NTC)

Note: There's no PE port in driver output for the luminaire connection, instead, the mounting hole of driver chassis could be connected for this function.

2. C and D version (Output with PE)

## **Programming Configuration**

Common setting functions and implementation methods/conditions are shown in the following table, more functions and details please refer to the LNA/EUCO Series Programming Tool User Manual.

	Item	DALI	DMX	
	Tool Connection	DA+,DA-	D1+,D1-	
Setup	AC power supply			
	Load Connection	0	0	
Tool	Delta Programming Tool	SDDV1505UAC (SDDV1505UAB, SDPTDV05UAB)		
	Max. current programming	$\checkmark$	$\checkmark$	
	Default output current	$\checkmark$	$\checkmark$	
Configurable	Luminaire OTP setting	$\checkmark$	$\checkmark$	
Parameters and Functions	Constant lumen output setting	$\checkmark$	$\checkmark$	
	Smart timer dimming	$\checkmark$	$\checkmark$	
	Software update	$\checkmark$	$\checkmark$	

Note: Required, O Optional,  $\sqrt{\text{Available}}$ .

## **Physical Dimensions**

A and C version 1.

custom AC input connection, use a Wieland RST20i3 green connector (96.031.4055.7 OR 96.031.0055.7)

b) Connect to the LED Output

Connector pin-out

1

10

CLICK!

õ.

and then separate connectors.

Pin	AC Input Connector
1	L1
2	L2
3	PE

Pin Arrangement

All parameters are specified at 25°C ambient for all products unless otherwise indicated. www.DeltaPSU.com (May. 2025, Rev. 03)

Align key features of larger output connector on driver with connector on luminaire cable.

Custom DC output connection, use a Amphenol X-lok C size connector (CC-03AFMM-QL8EXX(Overmolded with cable) OR CC-03BFMB-QL8APA(Field installable))

Push connectors together until the lock ring has snapped into place and a click is heard.

Connector pin-out

To disassemble connectors, twist the lock ring and then separate connectors.

Pin	A version	C version	
1	V+	V+	
2	NTC	PE	
3	V-	V-	

Pin Arrangement

### c) Connect to the Control/Dimming Output

Remove cap, align key features of Dimming connector on driver with connector on luminaire cable

Custom Dimming connection, use a Amphenol X-lok A size connector (AD-03BFFM-QL8DXX(Overmolded with cable) OR AD-03BFFB-QL8AP0(Field installable))

Push connectors together until the lock ring has snapped into place and a click is heard.

Connector pin-out

To disassemble connectors, twist the lock ring and then separate connectors.

Pin	Dimming Connector			
1	DA+	D1+		
3	+24V	COM		
4	DA-	D1-		

Pin Arrangement

Please note that Amphenol matching connector has two types as below. One is type A over molded with cable, which is suitable for the length of the cable is fixed, and the part number is CC-03AFMM-QL8EXX and AD-03BFFM-QL8DXX ("XX" the length of cable). The other is type B connector and cable are separated, it will be best option for field installation, the part number is CC-03BFMB-QL8APA and AD-03BFFB-QL8AP0.

2. D version

	Wire Color	Function	Cable Length	Strip Length	Sheath Length
	Brown	L			
Input Cable	Blue	Ν	300.0±25.0 mm	14.5±1.0 mm	25.0±2.0 mm
	Green/Yellow	PE			
	Brown	V+			
Output Cable	Blue	V-	240.0±25.0 mm	8.0±1.0 mm	20.0±2.0 mm
	Green/Yellow	PE			
	Purple	DA+/D1+			
Dimming Cable	Pink	DA-/D1-	300.0±25.0 mm	8.0±1.0 mm	20.0±2.0 mm
	Black/White	+24V/COM			

### Appendix

1. Operating Range Curve: constant power range 1090~2000mA (Full power output)

**Note:** EUCO ARENA SPORT 600W series can be programmed with wide output current through computer and programming tool. For more details, please refer to DALI programming User Manual or RDM/DMX programming User Manual.

#### 2. Life Time versus Case Temperature Curve

#### 3. Efficiency versus Load

#### 4. Power Factor versus Load

#### 5. THD versus Load

#### 6. Internal Over Temperature Protection

This function ensures that the driver works under safe operating temperature condition. When the ambient temperature exceeds a fixed threshold ( $T_{c1} = 90^{\circ}C$  typical), the output current will decrease to 20% automatically to reduce the internal temperature of the driver. The minimum output current ratio is 20% of the value before the internal OTP enabled. The output current will recover to 100% when the internal temperature is below recovery threshold ( $T_{c2} = 80^{\circ}C$  typical).

#### 7. Programmable External Over Temperature Protection

This protection is only available in version A and is an optional feature and user can ignore it without connecting to NTC connector in the junction box. The driver monitors the temperature of the LED module through NTC terminal. The output current will be reduced smoothly and linearly at OTP status and return to normal when the fault condition is removed.

The trigger point of this protection can be set easily according to the actual conditions of the LED fixtures, the user can set the trigger point between 80  $^{\circ}$ C and 110  $^{\circ}$ C by the Delta programming tool, and the default value is 100  $^{\circ}$ C. When the temperature exceeds the triggering point, the output current will decrease automatically to bring the temperature of the LED module back to safe value. More details about parameter setting please refer to DALI programming User Manual or RDM/DMX programming User Manual.

An external temperature sensing circuit is required to achieve the NTC terminal function to prevent the LED fixture from overheating.

The default setting is for a 33Kohm NTC, the circuits shown as both (a) and (b) below are acceptable.

Parameter Part Manufacturer Description NTC TSM1A333F3952RZA THINKING RES NTC 33Kohm F 3950K +/-1% SMD 0603 TP R2/R3 RC1206FR-07 5M1L YAGEO RES SMD 1/4W 5.1Mohm F 1206 Q1/Q2/Q3 PBHV9050T NEXPERIA 500V 150 mA PNP high-voltage low VCEsat transistor

**Note:** The circuits of above (a) and (b) have same OTP performance by using the same parts listed in the table, and to achieve good accuracy of OTP, Q2 should be placed close to NTC to make them have same temperature.

### 13 All parameters are specified at 25°C ambient for all products unless otherwise indicated. www.DeltaPSU.com (May. 2025, Rev. 03)

This product is also compatible with the circuitry for a 10Kohm NTC, this version could be selected and activated by "OTP on Fixture" section of GUI(Select "10K" in this section). The circuit and BOM table are shown as below.

Parameter	Part	Manufacturer	Description
NTC	B57371V2103H060	TDK	RES NTC 10Kohm F 4480K +/-3% SMD 0603 TP
R2/R3	RC1206FR-07 1ML	YAGEO	RES SMD 1/4W 1Mohm F 1206
Q1/Q2	PBHV9050T	NEXPERIA	500V 150 mA PNP high-voltage low VCEsat transistor

**Note**: The output voltage need to be over 300V to be effective by using this 10Kohm NTC version. And to achieve good accuracy of OTP, Q2 should be placed close to NTC to make them have same temperature.

#### 8. External SPD requirement for extra LED fixture common mode surge protection

The EUCO series driver has been designed with a built-in surge absorber which protects against lightning up to CM/DM 10kV level. The built-in surge absorber activates once a common mode surge intrusion occurring, which offers a protection against

any unexpected voltage surge to the LED module of  $\leq$  3kV.

Even though, EUCO Arena driver series do not require the installation of an additional SPD protect the driver and LED module against any unexpected surge voltage, it would allow to further strength the robustness protection capability against surge residual voltage of LED modules which allows the fixtures to be marketed globally by attributing different surge protector device (SPD) to meet differing surge levels.

However, Delta Electronics proposes not to install an external SPD at LED module side because it would be unsafe attributable to when this device would be triggered, a high common mode current will generate through driver and SPD that will cause some unexpected and irreversible damage to the driver.

#### 9. Warranty Policy

Please reach out our <u>Warranty Policy</u> should you require any further clarification.

#### 10. Attention

Delta provides all information in the datasheets on an "AS IS" basis and does not offer any kind of warranty through the information for using the product. In the event of any discrepancy between the information in the catalog and datasheets, the datasheets shall prevail (please refer to <u>http://www.DeltaPSU.com</u> for the latest datasheets information). Delta shall have no liability of indemnification for any claim or action arising from any error for the provided information in the datasheets. Customer shall take its responsibility for evaluation of using the product before placing an order with Delta.
