

DeltaPSU Product Notice

Product Upgrade Notice: Improved Surge Immunity for the Force-GT Series 3-Phase Models

At Delta, we recognize that reliable power delivery is crucial, especially in green energy applications, such as Electric Vehicle Charging Station and Energy Storage System. To further enhance the resilience and reliability of our power supplies, we have improved the surge immunity of our three-phase models from the Force-GT Series.

This improvement ensures better protection against power surges caused by lightning, grid fluctuations, or switching operations, significantly reducing the risk of equipment damage and downtime. For our customers, this means enhanced system stability and longer equipment lifespan, providing greater peace of mind in demanding environments.

Implementation Date: Aug-2024

Please refer to the table below for more details.

Model	Surge Immunity			Label Revision	
	Test Mode	Old	New	Old	New
DRF-24V120W3GBA , DRF-24V120W3GTA	Common Mode: Differential Mode:	4 kV 2 kV	6 kV with SPD 6 kV with SPD	00	01
DRF-24V240W3GBA , DRF-24V240W3GTA	Common Mode: Differential Mode:	4 kV 2 kV	6 kV with SPD 6 kV with SPD	00	01
DRF-24V480W3GBA , DRF-24V480W3GTA	Common Mode: Differential Mode:	4 kV 2 kV	6 kV with SPD 6 kV with SPD	00	01
DRF-24V960W3GBA	Common Mode: Differential Mode:	4 kV 2 kV	6 kV with SPD 6 kV with SPD	00	01
