

Product Change Notice of Arena Sport Series LED Drivers

Delta Electronics, Inc. ("Delta") would like to notify you about the necessary modification/change on the requirement on NTC detection circuit of the LED module for the Arena Sport series. We just delete the NTC circuit (a) and keep NTC circuit (b) only, but all the parameters of the components in the circuit remain unchanged (see the table). This new requirement is aimed at ensuring the consistency of temperature sampling accuracy and the anti-interference capability.

These change does not have any impact on all other functions or the performance of the products.

Should you require any further clarification, please reach out to us via our [Contact Us Form](#).

Model List:

Model Name	Implementation Date
EUCO-1K8200GCA	2025/09/01
